

IMPREZA WRX PERFORMANCE PACKAGE

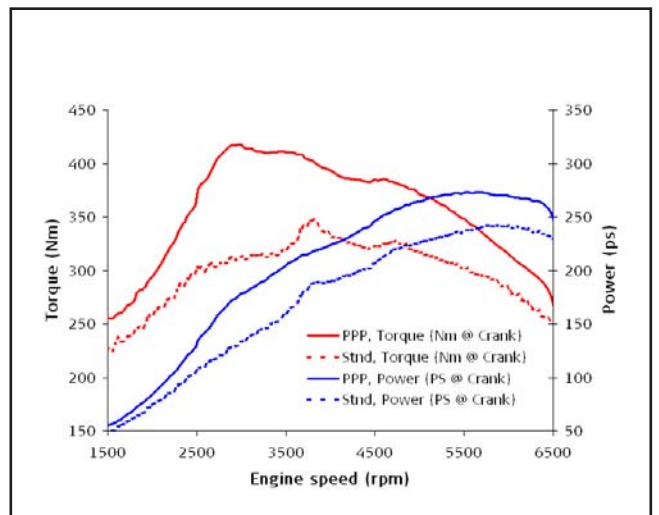

- 270 ps (266 bhp) @ 5,700 rpm
- 420 Nm (310 lbft) @ 3,000 rpm
- Recalibrated engine management system
- High flow intercooler hose
- Stainless steel sports exhaust silencers
- Only available as a complete package - components cannot be bought separately
- To fully benefit from the extra torque levels available, fitment of 18" wheels & tyres is recommended
- Complies with Euro 4 emissions and noise regulations as per 'supercar limits'

The Impreza WRX Performance Package has been designed by Prodrive to deliver class leading performance, boosting torque by over 30 percent and extending its availability across a wider rev range than the standard engine.

The improved performance is produced through a carefully developed combination of matched exhaust and engine management modifications. This combination of enhancements boosts peak power to 270 ps at 5,700 rpm (previously 230 ps at 5,600 rpm on the standard engine) and delivers an impressive 420 Nm of torque at 3,000 rpm - an improvement of 30 percent on the maximum torque of the standard car.

With the performance package fitted, the Impreza WRX has more torque than the peak of the standard road car, from 2,400 rpm, right through to 5,500 rpm. These impressive statistics ensure that drivers have the responsiveness required for performance driving, including all-important, mid-range overtaking.

SACC 2611	PPP-WRX-06	Impreza WRX Performance Package (06 MY)

IMPREZA WRX PERFORMANCE PACKAGE

IMPORTANT INFORMATION

- This enhancement is offered only as a complete package. The constituent parts are not available separately, as they will only show their full benefit when used together.

- Following installation of the performance package, cars can be serviced in the normal manner. All service parts are standard Subaru items.

- To obtain maximum benefit from the package, we recommend continued use of super unleaded (97 RON) fuel. Vehicles will run safely using 95 RON premium unleaded, but may not deliver their full potential due to the lower octane of this fuel.

- Customers should be advised that most car insurers require vehicle owners to inform them of any changes to vehicle specification. Failure to do this may invalidate their policy.

DEVELOPMENT NOTES

The performance figures reproduced below were derived during testing at Prodrive's proving ground, using its mile straight to accurately reproduce the dynamic environment that customers' cars will operate in, but under controlled, repeatable conditions.
