

2008 IMPREZA WRX STi PERFORMANCE PACK

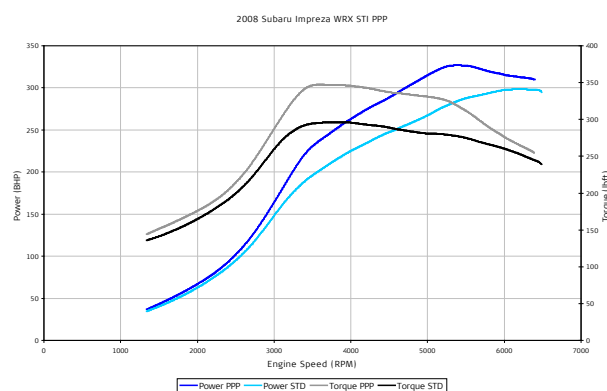

- 330 ps @ 5,400 rpm
- 470 Nm @ 3,400 rpm
- Recalibrated engine management system
- Stainless steel sports exhaust silencers
- Only available as a complete package - components cannot be bought separately
- Complies with Euro 4 noise and emissions regulations for type approval

The Impreza WRX STi Performance Package has been designed to deliver class leading performance, boosting torque by up to 20 percent and extending its availability across a wider rev range than the standard engine.

The improved performance is produced through a carefully developed combination of matched exhaust and engine management modifications.

This combination of enhancements boosts peak power to 330 ps at 5,400 rpm (previously 300 ps at 6,000 rpm on the standard engine) and deliver an impressive 470 Nm of torque at 3,400 rpm, an improvement of 15 percent on the maximum torque of the standard car.

With the performance package fitted, the Impreza WRX STi has more torque than the peak of the standard road car from 3,000 rpm, right through to 5,500 rpm. These impressive statistics ensure that drivers have the responsiveness required for performance driving, including all-important, mid-range overtaking.
